Topic B: Backgrounds and image size

Unit 6: Links  
Topic A: Creating links  
Topic B: Creating image maps  
Topic C: Using CSS link styles

Unit 7: Publishing  
Topic A: Web site publishing

### Objectives

Discuss basic Internet and HTML concepts; identify components of the Dreamweaver workspace; edit and format text; and view the HTML code for a Web page.

Plan and define a Web site; create a Web page; import text from other documents; and modify colors and other page properties.

Create paragraphs and basic page structures; insert special characters; format text by applying HTML tags and list formats; create CSS style sheets; and add style-sheet rules to control the appearance of content.

Create tables to arrange data and control page layout; set row and column properties; format tables; and use layout tables to design pages.

Choose appropriate image formats; embed images and set image properties; create appropriate alternate text; and apply background images.

Create links to other pages and resources; create named anchors, e-mail links, and image maps; and format links with CSS.

Connect to a Web server through a secure FTP connection; check a site for broken links and orphaned files; and upload a site.
