Course Description

In Microsoft® Office Excel® 2007: Level 1, you created, edited, formatted, and printed basic spreadsheets. You now have a need to streamline repetitive tasks and display spreadsheet data in more visually effective ways. In this course, you will use Microsoft Office Excel 2007 to streamline and enhance your spreadsheets with templates, charts, graphics, and formulas.

Course Objective: You will apply visual elements and advanced formulas to a worksheet to display data in various formats.

Target Student: The target students for this course are students who desire to gain the skills necessary to create templates, sort and filter data, import and export data, analyze data, and work with Excel on the web.

Prerequisites: Before starting this course, students are recommended to take the following Element K course or possess equivalent knowledge: Microsoft Office Excel 2007: Level 1.

Delivery Method: Instructor led, group-paced, classroom-delivery learning model with structured hands-on activities.

Performance-Based Objectives

Upon successful completion of this course, students will be able to:

- calculate with advanced formulas.
- organize worksheet and table data using various techniques.
- create and modify charts.
- analyze data using PivotTables and PivotCharts.
- insert graphic objects.
- customize and enhance workbooks and the Microsoft® Office Excel® environment.
